Life-Saving Tactical Technology At A Patrol Price

Your tactical team operators are equipped with all the latest life-saving technology, but they aren't the only ones who routinely face dangerous situations. Your patrol officers deal with high-risk situations every day - welfare checks, domestic disturbances, shots fired. Calls such as these are often quickly resolved, but for the responding officers each of these situations carries a great risk of the unknown.

The Recon Scout® Throwbot® LE was designed to help patrol officers mitigate the risk of such call outs. Designed and produced by ReconRobotics, the Throwbot LE delivers immediate situational awareness when you need it most. It tells you what lies inside the door, down the hallway or over a wall before you enter a location. Moreover, the Throwbot LE has many of the same performance characteristics of tactical robots, and it costs just \$4,875.

- Weighs less than 1.1 lbs, allowing for easy, immediate deployment
- Can survive horizontal throws of 50 feet and drops of 15 feet
- Operates at 20 decibels – quieter than a whisper
- Transmits video up to 100' indoors, and up to 300' outdoors
- Provides clear video in low-light environments

Like all other Recon Scout robots, the Throwbot LE works flawlessly with all Recon Scout accessories, including the SearchStick™ pole, a device that converts the Throwbot LE into a pole camera that can be used to see over walls, through windows and into other confined spaces. The LE is also available through an affordable Lease Program that every U.S. municipal or county law enforcement agency automatically qualifies for.

ReconRobotics, Inc. is the owner of various registered and use-based trademarks in the U.S. and worldwide, including Recon Scout, Throwbot and the dual-wheel, single-axle autonomous mobile robot.
